SUMMARY

Data analyst with over two years of experience in data visualization and user-facing instruction. Skilled in developing interactive dashboards and teaching data literacy using Power BI, Tableau and Excel, while conducting thorough data-quality checks to ensure reliability. Proven collaborator consulting with cross-functional teams and stakeholders to translate complex data into clear, actionable insights.

EXPERIENCE

VIA BOUND

2025 - Present

data analyst

nutely, NJ

- maintain data accuracy and compliance by validating data and following strict governance standards.
- I work with cross-functional teams to turn complex data into clear insights and impactful dashboards
- I analyze enterprise data using SQL and data warehouses to deliver actionable insights for business and risk decisions

BYJU'S

Aug 2021 - Jun 2023

Data Analyst – Product & Operations Analytics

Hyderabad, India

- Performed quantitative and qualitative data analysis using SPSS and Python to analyze learner engagement and operational datasets, supporting product and operations teams across regions.
- Developed SQL-based extraction and transformation workflows, reducing manual reconciliation work by 30%.
- Built automated dashboards and recurring KPI reports in Excel, Power BI, and Tableau, improving visibility into trends and key metrics and facilitating workshops on dashboard use.
- Conducted data validation and data-quality checks to improve reporting reliability and audit readiness, consulting with stakeholders on standards and tracking issues in JIRA.

The Sparks Foundation

Mar 2021 - Jun 2021

Data Science Intern

Hyderabad, India

- Built and automated end-to-end data ingestion and preprocessing workflows using Python and SQL, enhancing pipeline efficiency.
- Performed exploratory data analysis (EDA) and conducted qualitative coding in NVivo alongside data-quality checks to identify missing values, anomalies, and inconsistencies in datasets.
- Created interactive charts and dashboards using Matplotlib, Excel, and Tableau to communicate insights to non-technical stakeholders and deliver instruction sessions on data interpretation.

PROJECTS

Easy Autism Diagnosis

2024

Florida Atlantic University

- Built a structured dataset with standardized variable names and data types to improve data quality and interpretability for modeling.
- Documented preprocessing steps and feature definitions to support team collaboration and reproducibility.

GPU-Efficient Brain Tumor Segmentation

2024

Florida Atlantic University

- Implemented CNN/U-Net models using TensorFlow/Keras on MRI images (BRATS dataset) with standardized preprocessing pipelines.
- Logged experiments, hyperparameters, and metrics to maintain traceability of model versions and evaluations.

Credit Risk Prediction

2023

Florida Atlantic University

- Designed a data preparation pipeline with standardized field names, consistent categorical encoding, and validation checks.
- Produced summary tables and visualizations such as ROC-AUC and confusion matrices to communicate model performance.

SKILLS

- **Programming & Scripting:** Python, SQL, Java, C, basic PowerShell, Bash (basic), HTML, CSS, JavaScript, React (basic components, SPA concepts), Cloud-based Platforms, Data Manipulation Tools,
- **Databases:** MySQL, relational modeling, joins, views, stored queries, basic query optimization
- **Cloud & Data Platforms:** AWS (EC2, S3 basics), Microsoft Azure (fundamentals), Jupyter Notebook
- **Analytics & Governance:** Data profiling, data-quality checks, basic dimensional modeling, data dictionaries, metadata documentation, KPI definition and standardization, Analytical Skills, Data Analysis, SPSS, NVivo, Data Pipeline Development
- **Visualization & Reporting:** Power BI, Tableau, Excel (dashboards, pivot tables, KPI reporting), Matplotlib, Seaborn (basic)
- **Tools & Collaboration:** Git, GitHub, MS Office, MS Access, Visual Studio Code, PyCharm (basic), Generative AI Awareness
- **Professional & Instructional Skills:** Consultation Skills, Instruction Skills, Workshop Facilitation, Equity, Inclusion, Data Modeling Concept

EDUCATION

Florida Atlantic University

May 2025

Master of Science, Computer Science (STEM)

Boca Raton, FL

KL University

Mar 2022

Bachelor of Science, Computer Science (STEM)

India
